The lease-leaseback project delivery method is authorized by California Education Code §17406, and authorizes the governing board, without advertising for bids, to enter into a lease with a builder for the purpose of construction, including remodeling and permanent improvements, upon property.

This delivery method to construction has been recognized by the State Legislature as a proven method to deliver school facilities on time, on budget, and with a reduced level of public agency risk associated with design issues, delays and cost overruns. The Lease-Leaseback Agreement establishes a Guaranteed Maximum Price which is the total sum to be paid to the builder for the project.
